

§ 715.3 Amended declaration.

(a) Amended declarations are required to correct certain inaccuracies in a previously submitted declaration. These amended declarations are necessary to change a production range above the amount originally declared, or the production of a PSF-chemical above 30 metric tons by a plant not previously counted as a PSF-plant.

(b) Changes that do not directly affect the purpose of the Convention, such as changes to a company name, address, point of contact, or non-substantive typographical errors, do not require submission of an amended declaration and may be corrected in subsequent declarations.

(c) If you are required to submit an amended declaration pursuant to paragraph (a) of this section, you must complete and submit a new Certification Form and the specific form(s) being amended (e.g., annual declaration on past activities). Only complete that portion of each form that amends the previously submitted information.

SUPPLEMENT NO. 1 TO PART 715—DEFINITION OF AN UNSCHEDULED DISCRETE ORGANIC CHEMICAL

Unscheduled discrete organic chemical means any chemical: (1) belonging to the class of chemical compounds consisting of all compounds of carbon except for its oxides, sulfides and metal carbonates identifiable by chemical name, by structural formula, if known, and by Chemical Abstract Service registry number, if assigned; and (2) that is not contained in the Schedules of Chemicals (see Supplements No. 1 to parts 712 through 714 of this subchapter). Unscheduled discrete organic chemicals subject to declaration under this part are those produced by synthesis that are isolated for use or sale as a specific end-product.

NOTE: Carbon oxides consist of chemical compounds that contain only the elements carbon and oxygen and have the chemical formula C_xO_y , where x and y denote integers. The two most common carbon oxides are carbon monoxide (CO) and carbon dioxide (CO_2). Carbon sulfides consist of chemical compounds that contain only the elements carbon and sulfur, and have the chemical formula C_aS_b , where a and b denote integers. The most common carbon sulfide is carbon disulfide (CS_2). Metal carbonates consist of chemical compounds that contain a metal (i.e., the Group I Alkalies, Groups II Alkaline Earths, the Transition Metals, or the ele-

ments aluminum, gallium, indium, thallium, tin, lead, bismuth or polonium), and the elements carbon and oxygen. Metal carbonates have the chemical formula $M_d(CO_3)_e$, where d and e denote integers and M represents a metal. Common metal carbonates are sodium carbonate (Na_2CO_3) and calcium carbonate ($CaCO_3$). In addition, metal carbides or other compounds consisting of only a metal, as described above, and carbon (e.g., calcium carbide (CaC_2)), are exempt from declaration requirements (see § 715.1(a)(2)(ii)(D) of this part).

SUPPLEMENT NO. 2 TO PART 715—EXAMPLES OF UNSCHEDULED DISCRETE ORGANIC CHEMICALS (UDOCs) AND UDOC PRODUCTION

(1) Examples of UDOCs not subject to declaration include:

(i) UDOCs produced coincidentally as by-products that are not isolated for use or sale as a specific end product, and are routed to, or escape from, the waste stream of a stack, incinerator, or waste treatment system or any other waste stream;

(ii) UDOCs, contained in mixtures, which are produced coincidentally and not isolated for use or sale as a specific end-product;

(iii) UDOCs produced by recycling (i.e., involving one of the processes listed in paragraph (3) of this supplement) of previously declared UDOCs;

(iv) UDOCs produced by the mixing (i.e., the process of combining or blending into one mass) of previously declared UDOCs; and

(v) Intermediate UDOCs used in a single or multi-step process to produce another declared UDOC.

(2) Examples of UDOCs that you must declare under part 715 include, but are not limited to, the following, unless they are not isolated for use or sale as a specific end product:

(i) Acetophenone (CAS # 98-86-2);

(ii) 6-Chloro-2-methyl aniline (CAS # 87-63-8);

(iii) 2-Amino-3-hydroxybenzoic acid (CAS # 548-93-6); and

(iv) Acetone (CAS # 67-64-1).

(3) Examples of activities that are not considered production by synthesis under part 715 and, thus, the end products resulting from such activities would not be declared under part 715, are as follows:

(i) Fermentation;

(ii) Extraction;

(iii) Purification;

(iv) Distillation; and

(v) Filtration.
